

Sample handout. Host details and the vehicle-specific tutorial are added before guest use.

Get connected. Enjoy the drive.

Wireless Apple CarPlay: connect your iPhone, hear your audio and switch back to iDrive.

Set up your phone while safely parked.

Host / vehicle ID

Add your host name and vehicle identifier

Bluetooth device name

Use the name shown on the car's screen.

1 / Switch modes

Press and hold MENU.

Hold the **MENU** button to switch between iDrive and CarPlay mode.

Start in **CarPlay mode** before pairing your phone.

2 / Pair your iPhone

Connect wirelessly.

Open **Settings** → **Bluetooth** on your iPhone. Pair with the Bluetooth device whose name appears on the car's screen.

Once paired, wireless CarPlay will start.

3 / Audio in the BMW

Select AUX in iDrive.

Hold **MENU** to return to iDrive. Select **AUX** as the car's audio input source.

Hold **MENU** again to return to CarPlay.

4 / Audio on your phone

Select CarPlay output.

On your iPhone, select **CarPlay** as the audio output.

For sound through the car, use both:

BMW input = AUX

iPhone output = CarPlay

Connected, but no sound?

Check **AUX in iDrive** and **CarPlay as your iPhone's audio output**.

Need a hand? Contact your host.

Park safely and use your booking's messaging channel. Do not factory-reset the screen.
