

DRAFT · HOST DETAILS & TUTORIAL PENDING · REVIEW BEFORE SHARING

YOUR CONNECTED DRIVE

Get connected. Enjoy the drive.

Wireless Apple CarPlay on this BMW: connect your iPhone, hear your audio and switch back to iDrive.

Set up your phone while safely parked.

Host / vehicle ID

[Add host name and vehicle identifier]

Pairing device name

Use the Bluetooth name shown on the car's screen.

01 / SWITCH MODES

Press and hold MENU.

Hold down the **MENU** button to switch between iDrive and CarPlay mode.

Start in CarPlay mode before pairing your phone.

02 / PAIR YOUR IPHONE

Connect wirelessly.

On your iPhone, open **Settings** → **Bluetooth**. Select the Bluetooth device whose name appears on the car's screen and pair with it.

Once paired, wireless CarPlay will start.

03 / AUDIO IN THE BMW

Select AUX in iDrive.

Hold **MENU** to return to iDrive. Select **AUX** as the car's audio input source.

Hold MENU again to return to CarPlay mode.

04 / AUDIO ON YOUR PHONE

Select CarPlay output.

On your iPhone, select **CarPlay** as the audio output.

For sound through the car, both settings matter: **BMW input = AUX** and **iPhone output = CarPlay**.

NEED A HAND?

Your host is your first contact.

Park safely before troubleshooting. Contact your host through your booking's messaging channel. Do not factory-reset the screen.

Connected but no sound? Check AUX in iDrive and CarPlay as the audio output on your iPhone.
